### **Important notice**

On February 1, 2021, KKR & Co. Inc., or together with its subsidiaries, "KKR," completed the acquisition of Global Atlantic Financial Limited's former ultimate parent, Global Atlantic Financial Group Limited, or "GAFG," by The Global Atlantic Financial Group LLC (formerly Magnolia Parent LLC), a KKR subsidiary, or "TGAFG". Alongside the aforementioned acquisition, TGAFG also raised \$250 million of primary capital, of which \$215 million was contributed into Global Atlantic Financial Limited. The accompanying financial statements are presented for Successor and Predecessor periods, which relate to the accounting periods starting on, and ending before, February 1, 2021, respectively, the date of the closing of the acquisition, and also reflects the impacts of pushing down purchase accounting entries and the election of new accounting policies to conform to those of its new parent company, establishing a new accounting basis. In particular, upon acquisition, Global Atlantic Financial Limited and its subsidiaries ("Global Atlantic") became subject to certain accounting standards applicable to public companies, and in particular the standard on the recognition of current expected credit losses ("CECL") on financial instruments. The implementation of the latter resulted in Global Atlantic recognizing a credit loss allowance of \$228 million in net income during the two months ended March 31, 2021. See Note 2—"Significant accounting policies and practices" and Note 16 — "Acquisition" in the unaudited interim consolidated financial statements for additional information.

Where applicable, prior year disclosures have been conformed to (i) the current period presentation and (ii) revisions to non-GAAP measure definitions. Global Atlantic undertakes no obligation to update or correct the information in this Financial Supplement.

Certain totals may not sum to the corresponding components due to rounding.

Global Atlantic makes no representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of any of the information contained in this financial supplement. Global Atlantic does not accept any liability whatsoever for any direct, indirect or consequential losses (in contract, tort or otherwise) arising from the use of this financial supplement or its contents or any reliance on the information contained herein.

Certain information contained in this financial supplement constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "should," "expect," "anticipate," "project," "estimate," "target," "intend," "continue" or "believe," or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance may differ materially from those reflected or contemplated in such forward-looking statements. Past performance is not a guarantee of future results.

This financial supplement does not and shall not constitute an offer to buy or sell, or the solicitation of an offer to buy any securities of Global Atlantic. This financial supplement is not for distribution. THIS FINANCIAL SUPPLEMENT DOES NOT DISCLOSE THE RISKS AND OTHER SIGNIFICANT ISSUES RELATED TO AN INVESTMENT IN THE SECURITIES OF GLOBAL ATLANTIC. INVESTORS SHOULD ENSURE THAT THEY FULLY UNDERSTAND THE TERMS OF THE RELEVANT SECURITIES AND ANY APPLICABLE RISKS PRIOR TO TRANSACTING IN SECURITIES OF GLOBAL ATLANTIC. None of the information contained herein has been filed with the U.S. Securities and Exchange Commission, any securities administrator under any securities laws of any U.S. or non-U.S. jurisdiction or any other U.S. or non-U.S. governmental or self-regulatory authority. No such governmental authority or self-regulatory authority will pass on the merits of the adequacy of the information contained herein. Any representation to the contrary is unlawful.

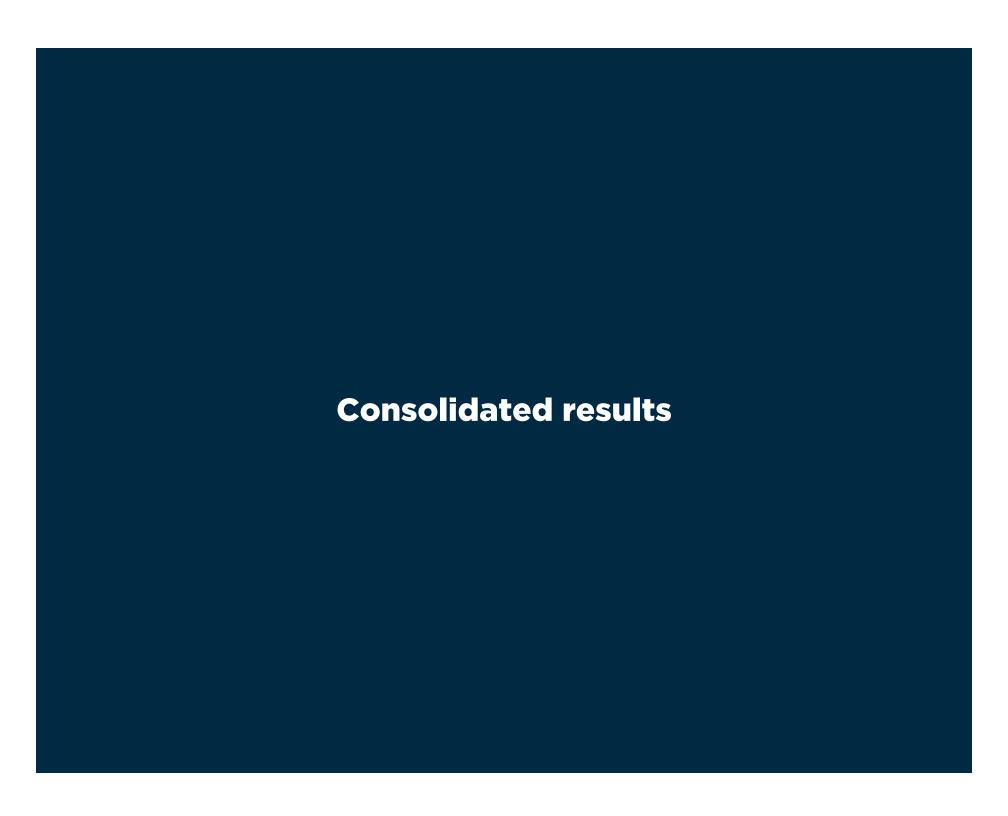

# **Credit ratings**

This list is provided for informational purposes only. Ratings are not recommendations to buy, sell, or hold securities, and each rating may be revised or revoked at any time at the sole discretion of the rating organization. Financial strength ratings apply to the issuing companies and do not apply to any specific product or underlying fund. Each individual insurer is solely responsible for the benefits and obligations of the products it issues.

	as of December 31, 2021
U.S. insurance subsidiaries <sup>(4)</sup>	401 %
Estimated consolidated RBC, including Bermuda subsidiaries <sup>(5)</sup>	436 %

<sup>(1)</sup> The Company has designated interest rate swaps to hedge the interest rate risk associated with the Senior Notes issued in October 2019 and due in 2029, and Senior Notes issued June 2021 and due in June 2031.

<sup>(5)</sup> Estimated consolidated RBC ratio includes our Bermuda insurance subsidiaries and the cash and securities at holding companies. U.S. Company Action Level, or "CAL", RBC factors are applied to the assets and liabilities of our Bermuda insurance subsidiaries to determine their CAL. Certain balances reflected in Total Available Capital, or "TAC", for Bermuda insurance subsidiaries are reported under an economic or principle-based approach.

**Risk-based capital** 

<sup>(2)</sup> Includes the impact to accumulated other comprehensive income ("AOCI") on available-for-sale securities that the Company does not expect to realize since the Company intends to hold the securities until maturity. As of June 30, 2022, the impact included \$9.1 billion in unrealized losses.

<sup>(3)</sup> Effective February 1, 2021, the date of the closing of the KKR acquisition, the AOCI balance was reduced to zero due to the impacts of pushing down purchase accounting entries and establishing a new accounting basis.

<sup>(4)</sup> Risk-Based Capital, or "RBC", for Commonwealth Annuity & Life Insurance Company, which consolidates all our U.S. insurance subsidiaries.

<sup>(1)</sup> New business volumes in individual markets are referred to as sales. In Company's individual market channel, sales of annuities include all money paid into new and existing contracts. Individual market channel sales of life insurance products are based on commissionable premium and individual market channel sales for preneed life are based on the face amount of insurance. Life insurance product sales do not include the recurring premiums that policyholders may pay over time.

<sup>(2)</sup> New business volume from the Company's institutional market channel is based on the assets assumed, net of any ceding commission, and is gross of any retrocessions to investment vehicles that participate in qualifying reinsurance transactions sourced by the Company and to other third party reinsurers.

<sup>(3)</sup> The Company expects block reinsurance transactions to be episodic rather than steady quarter over quarter. Similarly, funding agreements issued in the FABN program are subject to capital markets conditions and not expected to be consistent quarter over quarter.

<sup>(4)</sup> Funding agreement new business volumes represents funding agreements issued in connection with our FABN program only.

<sup>(5)</sup> Effective July 1, 2021, we entered into a reinsurance transaction, whereby we assumed \$7.9bn of assets. We then concurrently retroceded \$2.4 billion of assets to a third party on a funds withheld basis. New business volume from our Institutional channel reported above includes amounts concurrently retroceded.

Note: NRSRO and NAIC ratings have different methodologies. We believe the NAIC ratings methodology, which considers the likelihood of recovery of our amortized cost as opposed to the recovery of all contractual payments including the principal at par, is the more appropriate way to view the ratings quality of our AFS fixed maturity portfolio since a large portion of our holdings were purchased at a significant discount to par value.

#### **Non-GAAP financial measures**

In addition to presenting our results in accordance with GAAP, we use certain non-GAAP measures commonly used in our industry in analyzing performance. We believe the use of these non-GAAP measures, together with the relevant GAAP measures, provides a better understanding of our results of operations, financial condition, and the underlying profitability drivers of our business. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures. Our definitions of the various non-GAAP measures and other metrics discussed in this information statement may differ from those used by other companies.

The following key operating or non-GAAP measures should not be viewed as substitutes for the most directly comparable financial measures calculated in accordance with GAAP:

Key operating or non-GAAP measure	Comparable GAAP measure
Adjusted operating earnings, net of tax	Net income attributable to Global Atlantic Financial Limited shareholder
Adjusted income tax expense (benefit)	Income tax expense (benefit)
Adjusted operating tax rate	Effective tax rate
Adjusted ROE	ROE
Adjusted operating ROE	ROE
Adjusted invested assets	Total investments
Adjusted net investment income	Net investment income
Net investment earned rate	Investment yield
Adjusted operating return on assets, net of tax	Return on assets
Components of adjusted operating return on assets, net of tax	Components of return on assets
Adjusted net investment return ratio	Net investment return ratio
Adjusted net cost of insurance ratio	Net cost of insurance ratio
Adjusted general and administrative expense ratio	General and administrative expense ratio
Adjusted interest expense ratio	Interest expense ratio
Adjusted income tax expense ratio	Income tax expense ratio
Adjusted shareholders' equity	Total Global Atlantic Financial Limited shareholders' equity
Debt-to-adjusted capitalization	Debt-to-capitalization
Adjusted debt-to-adjusted capitalization	Debt-to-capitalization
New business volume	No comparable GAAP measure

#### Adjusted operating earnings, net of tax

Adjusted operating earnings, net of tax, a commonly used operating measure in the life and annuity insurance industry, is a non-GAAP measure used to evaluate our financial performance by excluding items that tend to be highly variable from period to period, primarily based on market volatility and non-core expenses. These adjustments are reported gross of income tax and, where applicable, net of offsets related to amortization of deferred policy acquisition costs, or "DAC," unearned revenue reserves, or "URR," and deferred sales inducements, or "DSI".

Our adjusted operating earnings, net of tax, is equal to reported net income attributable to Global Atlantic Financial Limited shareholders adjusted to eliminate the impact of items in the categories as described below. Adjusted operating earnings, net of tax includes variable investment income (loss) derived from realized gains and losses from the sale of investments not related to asset/liability matching strategies. Adjusted operating earnings, net of tax should not be used as a substitute for net income attributable to Global Atlantic Financial Limited shareholders as calculated in accordance with GAAP. We adjust for these items as we believe that these items distort the ability to make a meaningful evaluation of our business:

- Investment (gains) losses, net of offsets Investment (gains) losses adjustments consist primarily of the following:
  - Realized (gains) losses on the sale of AFS securities, net of offsets.
  - Unrealized (gains) losses on investments, impairments and allowance for loan losses, net of offsets are comprised of (1) investment fair value measurement adjustments recognized in earnings, (2) allowance for loan losses, (3) other investment impairments and (4) unrealized (gains) losses attributable to equity-method investments.
  - The change in the fair value of embedded derivatives underlying reinsurance with assumed and ceded modified coinsurance and funds withheld at interest and related trading securities, net of offsets the total change in the embedded derivatives and trading securities will net to zero over the life of the reinsurance contract.
  - An adjustment to reflect the reported net investment income and redeemable and non-redeemable non-controlling interest (in excess of), or less than, our long-term return expectations for renewable energy investments, net of offsets we account for our investments in renewable energy using either the equity method of accounting or consolidating. Renewable energy income can fluctuate significantly from period to period primarily driven by the application of the hypothetical liquidation at book value method of allocating income. Such fluctuations are reported in net investment income and also within net income attributable to redeemable and non-redeemable non-controlling interests.
- Derivative (gains) losses, net of offsets primarily consist of adjustments for (i) the period-to-period change in the fair value of derivatives hedging the market risk of fixed-indexed annuities, indexed universal life policies and variable annuities; (ii) the period-to-period change in the fair value of derivatives and embedded derivatives associated with changes in financial market conditions, such as the level of interest rates and equity markets; and (iii) fair value adjustments related to certain policy liabilities held under the fair value option, and hedging derivative gains and losses not related to fixed-indexed annuities, indexed universal life policies and variable annuities.
- Transaction, integration, equity-based compensation expenses and intangible amortization primarily consist of equity-based compensation and expenses incurred in connection with strategic transactions, such as the acquisition of Global Atlantic by KKR, and implementation of new accounting standards.
- Income tax adjustments calculated by applying the appropriate jurisdiction's tax rate (21% for U.S. operations and our Bermuda entity taxed as U.S. taxpayers and 0% for Bermuda entities not taxed as a U.S. taxpayer) to the adjustments that are subject to income tax. The income tax adjustment for interim periods is calculated using an estimate of the annual adjusted operating tax rate. The adjusted operating tax rate could differ from the insurance segment's effective tax rate as determined under GAAP.

#### Adjusted income tax expense and adjusted operating tax rate

Adjusted income tax expense is equal to income tax expense adjusted for income tax adjustments as described above under "— Adjusted operating earnings, net of tax." Adjusted income tax expense should not be used as a substitute for income tax expense as calculated in accordance with GAAP. However, we believe the adjustments to income tax expense are useful to gaining an understanding of our results of operations.

Adjusted operating tax rate is equal to adjusted income tax expense divided by adjusted operating earnings, before income taxes. Adjusted operating tax rate should not be used as a substitute for effective tax rate as calculated in accordance with GAAP. However, we believe the adjusted operating tax rate is useful to gaining an understanding of our results of operations.

#### Adjusted ROE and adjusted operating ROE

We use adjusted ROE and adjusted operating ROE to evaluate our financial performance by excluding items that tend to be highly variable from period to period based on market volatility and non-core expenses, such as AOCI and accumulated change in fair value of reinsurance balances and related assets. AOCI varies in a manner inconsistent with our underlying profitability drivers, as the majority of such fluctuation is related to the market volatility of the unrealized gains and losses associated with our AFS securities. Accordingly, we believe using measures which exclude the above mentioned items is more effective in analyzing the trends of our operations. Adjusted ROE and adjusted operating ROE should not be used as a substitute for ROE as calculated in accordance with GAAP. However, we believe the adjustments to equity and earnings are useful to gaining an understanding of our results of operations.

#### **Adjusted invested assets**

Adjusted invested assets represent the investments that back our policy liabilities as well as surplus assets. Adjusted invested assets is used in the computation of net investment earned rate, which allows us to analyze the performance of our investment portfolio. Adjusted invested assets includes (1) total investments on the consolidated balance sheets with available-for-sale securities at cost or amortized cost, (2) cash, cash equivalents and restricted cash, and (3) accrued investment income. Adjusted invested assets excludes the following items that are included in total investments but do not produce net investment income reflective of ongoing operations: (1) assets associated with funds withheld at interest liabilities related to business exited through reinsurance agreements, (2) embedded derivatives associated with funds withheld at interest receivables, (3) securities sold under repurchase agreements, (4) investment related receivables and payables, (5) redeemable and non-redeemable non-controlling interests in consolidated renewable energy partnerships, and (6) strategic equity investments, which currently consists of our investments in Origis. We include the underlying investments supporting our assumed funds withheld at interest and modified co-insurance agreements in our adjusted invested assets calculation in order to match the assets with the income received.

Adjusted invested assets should not be used as a substitute for total investments as calculated in accordance with GAAP. However, we believe the adjustments to total investments provide a view of the assets from which we earn investment income.

#### Adjusted net investment income and net investment earned rate

Adjusted net investment income is calculated as reported net investment income adjusted for renewable energy income (loss), unrealized (gains) losses attributable to equity-method investments, and variable investment income (loss) as described above under "— Adjusted operating earnings, net of tax," excluding the impact of non-controlling interest. Adjusted net investment income should not be used as a substitute for net investment income. However, we believe adjusted net investment income is significant to gaining an understanding of the overall performance of our portfolio of adjusted invested assets.

Net investment earned rate is computed as adjusted net investment income, as described above, divided by the average adjusted invested assets for the relevant period. Net investment earned rate should not be used as a substitute for investment yield as calculated in accordance with GAAP. However, we believe net investment earned rate is useful to gaining an understanding of the overall performance of our adjusted invested assets.

#### Adjusted operating return on assets, net of tax

Adjusted operating return on assets, net of tax is equal to adjusted operating earnings, net of tax divided by average adjusted total investments. Adjusted operating return on assets, net of tax should not be used as a substitute for return on assets, as calculated in accordance with GAAP. However, we believe adjusted operating return on assets, net of tax is useful to gaining an understanding of our results of operations relative to the underlying investment base which generates earnings.

#### Components of adjusted operating return on assets, net of tax

When analyzing return on assets and adjusted operating return on assets, net of tax, we also consider certain ratios that aggregate to return on assets and adjusted operating return on assets, net of tax, namely: (1) net investment income as a percentage of average total investments and adjusted net investment income as a percentage of average adjusted invested assets, (2) net cost of insurance as a percentage of average total investments and adjusted net cost of insurance as a percentage of average adjusted invested assets (the combination of (1) and (2) is also referred to as the "net underwriting ratio", or the "adjusted net underwriting ratio"), (3) general, administrative and other expenses as a percentage of average total investments and adjusted general, administrative and other expenses as a percentage of average adjusted invested assets (4) interest expense as a percentage of average total investments and adjusted tax expense as a percentage of adjusted invested assets. Altogether, we refer to the foregoing as the "components of return on assets," or "the components of adjusted operating return on assets, net of tax."

The components of adjusted operating return on assets, net of tax, individually or in the aggregate, should not be used as a substitute for the respective or aggregated components of return on assets, as calculated in accordance with GAAP. However, we believe adjustments to the respective or aggregated components of return on assets are useful to gaining an understanding of our results of operations relative to our underlying asset base generating earnings.

The components of adjusted operating return on assets, net of tax, are defined as follows:

#### Adjusted net investment return ratio

Adjusted net investment return ratio is calculated by dividing adjusted net investment income by average adjusted invested assets.

#### Adjusted net cost of insurance and adjusted net cost of insurance ratio

Adjusted net cost of insurance is equal to reported net underwriting income, excluding net investment income, and adjusted for (i) investment gains (losses) other than renewable energy income (loss), unrealized (gains) losses attributable to equity-method investments, and variable investment income (loss); and (ii) change in the fair value of derivatives, embedded derivatives, and fair value option reserves associated with fixed-indexed annuities, index universal life contracts and variable annuities; and (iii) transaction, integration and equity-based expenses. These adjustments are reported gross of income tax and, where applicable, net of offsets related to DAC, VOBA, URR and DSI amortization. Adjusted net cost of insurance ratio is calculated as adjusted net cost of insurance divided by average adjusted invested assets. Net cost of insurance ratio is calculated as net cost of insurance divided by average total investments. Refer to "—Adjusted operating earnings, net of tax" above for additional details regarding the foregoing adjustments.

#### Adjusted general, administrative and other expenses and adjusted general, administrative and other expense ratio

Adjusted general, administrative and other expense is equal to reported general, administrative and other expense adjusted for certain transaction, integration and equity-based compensation expense, as described above. Adjusted general, administrative and other expense ratio is adjusted general, administrative and other expense divided by average adjusted invested assets.

#### Adjusted interest expense ratio

Adjusted interest expense ratio is interest expense, as reported, divided by average adjusted invested assets.

#### Adjusted income tax expense ratio

Adjusted income tax expense ratio is adjusted income tax expense, as defined above under "—Adjusted income tax expense and adjusted operating tax rate," divided by average adjusted invested assets.

#### Adjusted shareholders' equity

Adjusted shareholders' equity calculated as total Global Atlantic Financial Group Limited shareholders' equity, as reported, less (1) accumulated other comprehensive income, as reported, and (2) accumulated change in fair value of reinsurance balances and related assets, net of income tax offsets. The change in the fair value of reinsurance balances and related assets represents the change in value of embedded derivatives underlying reinsurance with assumed and ceded modified coinsurance and funds withheld at interest and related trading securities. Adjusted shareholders' equity should not be used as a substitute for total Global Atlantic Financial Group Limited shareholders' equity as calculated in accordance with GAAP. However, we believe the adjustments to shareholders' equity are useful to gaining an understanding of our overall results of operations and financial condition.

#### Debt-to-adjusted capitalization and adjusted debt-to-adjusted capitalization

Debt-to-adjusted capitalization is calculated as debt divided by the aggregate of total Global Atlantic Financial Limited shareholders' equity and debt, or "capitalization," adjusted to exclude AOCI. Adjusted debt-to-adjusted capitalization and debt fair value adjustments is calculated using debt adjusted to exclude 50% of the outstanding principal amount of the subordinated debentures as an equity credit, and an adjustment to both the debt and capitalization numerator and denominator for the cumulative changes in fair value recognized due to the application of hedge accounting. We exclude a portion of the outstanding principal amount of the subordinated debentures because their terms result in the subordinated debentures receiving equity credit under certain NRSRO methodologies. Adjusted debt-to-adjusted capitalization should not be used as a substitute for debt-to-capitalization as calculated in accordance with GAAP debt divided by capitalization. However, we believe the adjustments to our debt-to-capitalization are useful to gaining an understanding of our overall financial condition.

#### **New business volume**

In our Individual channel, retirement sales of annuities include all money paid into new and existing contracts. Individual channel sales of traditional life products are based on commissionable premium, a commonly used industry sales metric, and individual channel sales for preneed life are based on the face amount of insurance. Traditional life sales do not include the recurring premiums that policyholders may pay over time. New business volume from our institutional channel is based on the assets assumed, net of any ceding commission. We also refer to new business volume originated through the individual channel as "sales." Institutional channel new business volume is based on the assets assumed, net of any ceding commission. New business volume should not be used as a substitute for revenue as calculated in accordance with GAAP. However, we believe new business volume statistics are useful to gaining an understanding of our overall results of operations.
